Research-in-Progress Meeting

A Research-in-Progress meeting is a forum where researchers can solicit feedback and discuss research ideas, study design and implementation, results, and dissemination with fellows, clinicians and senior HIV researchers and biostatisticians.

Expanding community virus screening programs and statewide virus elimination efforts

Emmanuel Thomas, MD, PhD, FAASLD
Associate Professor
Department of Microbiology

The mission of Dr. Thomas’s research program is to develop integrated, multidisciplinary approaches for the study of virus driven diseases and to bridge clinical medicine and basic science with translation of fundamental knowledge to prevention, diagnosis, and treatment of viral diseases and related cancers.

Having been raised in Miami-Dade county, Dr. Thomas has a strong commitment to improving the health of our local community. Through our community virus screening programs and statewide virus elimination efforts, we are identifying infected individuals and linking them to care. In addition, we are also facilitating the ability of uninsured patients to receive costly medications through patient assistance programs.

Wednesday, June 3rd, 2:30 – 3:30 PM

Register in advance at:
